POLICY ON ADDITIONAL STUDENT INTAKE QUOTA FOR MEDICAL SPECIALIST PROGRAMMES

The Educational Training Provider (ETP) is to determine its capacity and number of student intake - as per requirements in respective Specialty Specific Requirements (SSR) especially the trainer-trainee ratio, case mix and case load, and evidence of clinical training capacities (hospital and or appropriate training center). The Malaysian Medical Council (MMC) will evaluate the ETP's ability in handling the existing student number during the full accreditation visit based on its compliance to SSR requirements.
