

# **MALAYSIAN MEDICAL COUNCIL**

## **SPECIALTY-SPECIFIC REQUIREMENTS (SSR)**

### **(ANAESTHESIOLOGY AND CRITICAL CARE)**

Prepared By:

Specialty Education Subcommittee (SEC)  
of the Medical Education Committee (MEC),  
Malaysian Medical Council

Approved by the Malaysian Medical Council:

22<sup>th</sup> July 2025

## **Preface**

1. The Specialty-Specific Requirements (SSR) pertain to requirements within each specialty and specify the minimum requirements pertaining to the training curriculum, trainers, educational resources and head of programme.
2. The Specialty-Specific Requirements (SSR) are intricately linked to the MMC Malaysian Standards for Medical Specialist Training 2019, and the Standards and SSR must be read and applied together.

| <b>Specialty-Specific Minimum Requirements for Training Curriculum (Based on Area 1.2.4 of Malaysian Standards for Medical Specialist Training) - Anaesthesiology and Critical Care</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                           |       |         |                           |                                   |  |    |                         |                                               |  |  |                                                                                                             |   |  |                                                     |   |  |              |   |  |             |   |
